Professional Summary

Senior React.js Developer with 3+ years of experience building enterprise-grade SaaS applications, ERP systems, logistics platforms, procurement solutions, healthcare marketplaces, and outdoor media management products.

Strong expertise in React.js, Next.js, JavaScript (ES6+), Redux Toolkit, Ant Design, REST API integration, responsive UI development, component-driven architecture, and modern frontend engineering practices. Proven experience delivering scalable admin dashboards, workflow automation systems, analytics platforms, and business-critical web applications used by enterprise clients.

Skilled in collaborating with cross-functional teams to translate complex business requirements into intuitive, high-performance user experiences. Hands-on exposure to Node.js, Express.js, MongoDB, authentication systems, and full-stack application workflows.

Technical Skills

Frontend Technologies: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Ant Design

State Management: Redux Toolkit

API Integration: REST APIs, Google Maps API, Stripe Payment Gateway

UI Development: Responsive Design, Component-Driven Architecture, Admin Dashboards, Role-Based Access Control (RBAC)

Tools & Development: Git, GitHub, Postman, VS Code, Chrome DevTools

Additional Exposure: Node.js, Express.js, MongoDB, JWT Authentication

Professional Experience

Senior React.js Developer

Nivzen Technologies

June 2023 – Present

Ahmedabad, Gujarat

- Led frontend development for enterprise SaaS applications, ERP systems, logistics platforms, procurement solutions, healthcare marketplaces, and outdoor media management products.
- Developed scalable React.js applications using Redux Toolkit, Ant Design, REST APIs, and modern component-driven architecture.
- Designed reusable UI components and modular frontend architectures, improving maintainability and accelerating feature delivery.
- Built operational dashboards, reporting systems, workflow automation modules, and data-intensive business management interfaces.
- Implemented role-based access control (RBAC), authentication workflows, and enterprise permission management systems.
- Integrated Google Maps APIs for shipment tracking, route optimization, geolocation services, and logistics workflows.
- Developed PDF generation, reporting, and print functionality using jsPDF and react-to-print.
- Collaborated closely with product managers, backend developers, designers, and stakeholders to deliver production-ready software solutions.
- Improved application performance through optimized state management, efficient API integration, and reusable architecture patterns.
- Participated throughout the complete software development lifecycle including requirement analysis, implementation, testing, deployment, and production support.

Projects

OutdoorX – Enterprise Outdoor Media Management Platform — Team Lead

app.outdoorx.ai

Technologies: React.js, Redux Toolkit, Ant Design, REST APIs

- Built a production-grade outdoor media management platform used for centralized monitoring and control of digital advertising devices.

- Developed intelligent dashboards, device management systems, scheduling workflows, and real-time monitoring modules.
- Implemented role-based access control (RBAC), operational reporting dashboards, and workflow automation features.
- Integrated REST APIs supporting device communication, analytics reporting, and operational visibility.
- Contributed to scalable frontend architecture using React.js, Redux Toolkit, and Ant Design.

HeyCouriers – Logistics Management Platform — Team Lead

app.heycouriers.com.au

Technologies: React.js, Redux, Ant Design, Google Maps API, REST APIs

- Built a production-grade courier management system used across Australia.
- Developed shipment tracking workflows, logistics dashboards, reporting modules, and operational monitoring interfaces.
- Integrated Google Maps APIs for route optimization, geolocation services, and address validation.
- Led frontend architecture, API integration, and UI standardization across the platform.

Alux ERP – Aluminium Extrusion ERP

aluka.aluxerp.com

Technologies: React.js, Redux Toolkit, Ant Design, REST APIs

- Developed inquiry management workflows, extrusion process modules, inventory tracking systems, and logistics operations.
- Built enterprise ERP functionality supporting manufacturing workflows and operational efficiency.
- Developed reporting dashboards and business management interfaces.

Hasten Extrusions ERP

app.hastenextrusions.com

Technologies: React.js, Ant Design, jsPDF, react-to-print, REST APIs

- Developed Profile Management, Bundle Inward workflows, and operational reporting systems.
- Implemented role-based access control (RBAC) and enterprise permissions management.
- Built complex data tables, PDF generation workflows, and print functionality using jsPDF and react-to-print.

Procem (SmartBuyer) – Procurement Management Platform

procem.ai

Technologies: React.js, Redux Toolkit, Ant Design, REST APIs

- Developed procurement workflows supporting RFQs, Purchase Orders, GRNs, Billing, Approvals, and Supplier Management.
- Built enterprise procurement interfaces and multi-step approval workflows.
- Improved procurement lifecycle visibility and operational efficiency through workflow automation.

PharmaLinkage – Global Pharma Sourcing Platform

pharmalinkage.com

Technologies: React.js, Ant Design, Stripe Payment Gateway, REST APIs

- Developed healthcare marketplace features connecting pharmaceutical manufacturers and suppliers.
- Integrated Stripe payment gateway for secure online transactions.
- Built responsive user interfaces, sourcing workflows, and supplier management functionality.

HomeDelish – Full Stack MERN Food Ordering Platform (Personal Project)

Technologies: React.js, Node.js, Express.js, MongoDB, JWT Authentication, Stripe

- Built a full-stack MERN food ordering platform with user authentication, menu browsing, cart management, order placement, and payment integration.
- Developed backend APIs using Node.js and Express.js.
- Designed MongoDB database schemas and implemented JWT-based authentication and authorization.
- Integrated Stripe payment gateway and responsive user interfaces optimized for mobile and desktop users.

Education

Bachelor of Technology (Information Technology)

Indus University, Ahmedabad

CGPA: 9.4 / 10

2019 – 2023

Certifications

- The Complete JavaScript Course: From Zero to Expert! (Udemy)
- JavaScript and React JS Bootcamp (ShapeAI)
- JavaScript - Basic to Advanced
