

JAYDEEP RATHOD

Ahmedabad-60, Gujarat, IN · jaydeepraj2001@gmail.com · +91 7041041197

PROFESSIONAL SUMMARY

Senior React.js Developer with 3+ years of experience building enterprise-grade SaaS applications, ERP systems, logistics platforms, procurement solutions, healthcare marketplaces, and outdoor media management products. Strong expertise in React.js, Next.js, JavaScript (ES6+), Redux Toolkit, Ant Design, REST API integration, responsive UI development, reusable component architecture, and modern frontend engineering practices. Experienced in developing scalable admin dashboards, workflow automation systems, analytics platforms, and business-critical web applications used by enterprise clients.

EDUCATION

Indus University

Information & Technology (B.TECH IT)

CGPA – 9.4/10

St Mary's School

Ahmedabad, Gujarat, India

2019 - 2023

2019

CERTIFICATIONS

The Complete JavaScript Course: From Zero to Expert!

JavaScript - Basic to Advanced

Certification for JavaScript and React JS bootcamp *ShapeAI*

SKILLS

Frontend

React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Ant Design

APIs & Integrations

REST APIs, Google Maps API, Payment Gateway, jsPDF, react-to-print

Tools & Dev Environment

Git, GitHub, VS Code, Postman, Chrome DevTools

UI & Architecture

Responsive UI Design, Role-Based Access Control, Admin Dashboards, Component-Driven Architecture

PROJECTS

OutdoorX – Enterprise Outdoor Media Management Platform | Team Lead

Built with: React.js, Redux Toolkit, Ant Design, REST APIs

<https://app.outdoorx.ai/> | <https://outdoorx.ai/>

- Led frontend development for an enterprise outdoor media management platform.
- Developed intelligent dashboards, device management, scheduling workflows, and real-time monitoring modules.
- Integrated REST APIs, implemented Role-Based Access Control (RBAC), and built reusable React components for scalable frontend architecture.

HeyCouriers – Built with React.js & Ant Design | Team Lead

Built with: React.js, Redux, Ant Design, Google Maps API, REST APIs

<https://app.heycouriers.com.au/> | <https://heycouriers.com.au/>

- Led frontend architecture and developed shipment tracking, driver management, and customer operation modules.
- Integrated REST APIs and Google Maps API for route optimization, address validation, and real-time logistics workflows.
- Built responsive dashboards and standardized reusable UI components across the application.

Alux ERP – Aluminium Extrusion ERP

Built with: React.js, Redux Toolkit, Ant Design, REST APIs

<https://aluka.aluxerp.com/>

- Developed inquiry management, extrusion process, inventory, and logistics modules.
- Integrated REST APIs to manage manufacturing workflows and real-time operational data.
- Built responsive dashboards and reusable UI components for enterprise ERP operations.

Hasten Extrusions - ERP System for Hasten Extrusions Pvt Ltd

Built with: React.js, Redux Toolkit, Ant Design, jsPDF, react-to-print, REST APIs

<https://app.hastenextrusions.com/>

- Developed Profile Management, Bundle Inward, and Reporting modules.
- Integrated REST APIs and implemented Role-Based Access Control (RBAC) for secure business operations.
- Built PDF generation, print functionality, and advanced data tables using Ant Design.

Procem – Procurement Management System

Built with: React.js, Ant Design, REST APIs

<https://procem.ai/> | <https://dev.smartbuyer.co.in/>

- Developed procurement modules including Indents, RFQs, Purchase Orders, GRNs, Billing, and Approval workflows.
- Built supplier management interfaces and multi-step procurement workflows.
- Integrated REST APIs to enable real-time procurement operations and business data synchronization.

PharmaLinkage – Global Pharma Sourcing Platform

Built with: React.js, Ant Design, Stripe Payment Gateway, REST APIs

<https://pharmalinkage.com/>

- Developed responsive healthcare marketplace interfaces and sourcing workflows.
- Integrated REST APIs for supplier management and business operations.
- Integrated Stripe Payment Gateway for secure online transactions.

HomeDelish – Real-Time Homemade Food Ordering Platform - JavaScript, Node.js, MongoDB

[GitHub - jaydeepprathod20/Home-Delish: Food Ordering Website](https://github.com/jaydeepprathod20/Home-Delish: Food Ordering Website)

- Developed a full-stack food ordering platform with authentication, cart, and order management.
- Built backend REST APIs using Node.js and Express.js with MongoDB integration.
- Integrated Stripe Payment Gateway and implemented responsive user interfaces.

EXPERIENCE

Senior Frontend Developer (React.js)

Nivzen Technologies, Ahmedabad

June 2023 – Present

- Led frontend development for multiple SaaS platforms including logistics, ERP, procurement, and B2B marketplaces used by enterprise clients.
- Built and maintained large-scale React applications using Ant Design, Redux, and REST APIs with secure role-based access control.
- Developed admin dashboards, advanced data tables, and reporting modules handling high-volume operational data.
- Integrated Google Maps APIs for real-time tracking, route optimization, and address validation.
- Implemented PDF generation and print workflows using jsPDF and react-to-print for invoices, shipment labels, and ERP reports.
- Collaborated closely with backend teams (Django & Node.js) to integrate APIs and ensure smooth data flow.
- Improved UI consistency, performance, and scalability across multiple production systems.

HONORS

Nominated for Smart India Hackathon (SIH) 2020 Indus University
