## CERTIFICATIONS

---

The Complete JavaScript Course: From Zero to Expert!  
JavaScript - Basic to Advanced  
Certification for JavaScript and React JS bootcamp *ShapeAI*  
Flutter For Beginners

## SKILLS

---

### Frontend

React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Ant Design, Redux

### APIs & Integrations

REST APIs, Google Maps API, Stripe Payment Gateway, jsPDF, react-to-print

### Tools & Dev Environment

Git, GitHub, VS Code, Postman, Chrome DevTools

### UI & Architecture

Responsive UI Design, Role-Based Access Control, Admin Dashboards, Component-Driven Architecture

## PROJECTS

---

### HeyCouriers – Built with React.js & Ant Design | Team Lead

<https://app.heycouriers.com.au/> | <https://heycouriers.com.au/>

Built a production-grade courier management system used in Australia. Developed an admin panel for shipment tracking, driver management, and customer operations. Integrated **Google Maps** for route optimization and address validation. Led frontend architecture, API integration, and UI standardization.

### Alux ERP – Aluminium Extrusion ERP - React.js, Redux Toolkit, Ant Design

<https://aluka.aluxerp.com/>

Built a production-grade aluminium extrusion ERP system with inquiry management, extrusion process flow, inventory tracking, and logistics operations

### ERP System for Hasten Extrusions Pvt Ltd – React.js, Redux, Ant Design

<https://app.hastenextrusions.com/>

Developed a full-scale ERP web application with modules such as **Profile Management, Bundle Inward, and Reporting**. Built complex data tables, implemented role-based access, and added **PDF and print functionality** using jsPDF and react-to-print.

#### **Procem – Procurement Management System (SmartBuyer) - React.js and Ant Design**

<https://procem.ai/> | <https://dev.smartbuyer.co.in/>

Built a procurement workflow platform supporting **indents, RFQs, approvals, GRNs, purchase orders, and billing**. Developed UI for supplier management, approvals, and multi-step procurement flows.

#### **PharmaLinkage – Global Pharma Sourcing Platform – React.js, Ant Design, Stripe**

<https://pharmalinkage.com/>

Contributed to a global B2B marketplace connecting pharmaceutical manufacturers and suppliers. Built responsive UI components and **sourcing workflows**. Integrated **Stripe** for secure online payments.

#### **HomeDelish – Real-Time Homemade Food Ordering Platform - JavaScript, Node.js, MongoDB**

[GitHub - jaydeephathod20/Home-Delish: Food Ordering Website](https://github.com/jaydeephathod20/Home-Delish: Food Ordering Website)

Built a real-time food ordering platform with **menu browsing, cart, order placement, and Stripe payment integration**. Designed responsive UI and backend APIs.

### EXPERIENCE

---

#### **Senior Frontend Developer (React.js)**

##### **Nivzen Technologies, Ahmedabad**

*June 2023 – Present*

- Led frontend development for multiple SaaS platforms including logistics, ERP, procurement, and B2B marketplaces used by enterprise clients.
- Built and maintained large-scale React applications using Ant Design, Redux, and REST APIs with secure role-based access control.
- Developed admin dashboards, advanced data tables, and reporting modules handling high-volume operational data.
- Integrated Google Maps APIs for real-time tracking, route optimization, and address validation.
- Implemented PDF generation and print workflows using jsPDF and react-to-print for invoices, shipment labels, and ERP reports.
- Collaborated closely with backend teams (Django & Node.js) to integrate APIs and ensure smooth data flow.
- Improved UI consistency, performance, and scalability across multiple production systems.

### HONORS

---

#### **Nominated for Smart India Hackathon (SIH) 2020 Indus University**
